Profile

CSPO-Certified Product Manager & IIM Alumnus with 2.5+ years of experience shipping scalable AI, AR, and computer vision products for global enterprise clients. Proven track record transitioning from mobile application leadership to heading AI Infrastructure verticals. Expertise in driving precision/recall optimization, scaling localized enterprise platforms, and pioneering agentic automation to deliver data-driven solutions in fast-paced Agile environments.

Professional Experience

Product Manager

01/2025 – Present

Scans.AI

Johannesburg, SA (Remote)

- Owned end-to-end product delivery for **AI, computer vision, and AR-powered mobile applications** used by global mobility, inspection, and claims clients across multiple regions.
- Led cross-functional teams across **engineering, QA, design, data, AI/ML, annotation, and release** to deliver scalable mobile products under aggressive timelines.
- Built AI-driven workflows for **vehicle damage detection, claims assessment, image quality validation, identity verification, and vehicle inspections**, improving reliability and reducing manual review effort.
- Drove client-specific customization while maintaining a **scalable core platform**, enabling faster enterprise onboarding across markets.
- Owned **roadmap prioritization, release planning, and trade-off decisions** across customer, technical, and operational requirements.

Key Projects & Impact

AI Infrastructure & Damage Detection

- Owned improvement cycles for internal damage detection models covering **dents, scratches, chips, broken parts, stains, and missing components**, tracking precision and recall by category to improve model reliability.
- Managed the AI annotation pipeline from **model prediction to ground-truth validation**, coordinating **1,500+ vehicle assessments per cycle** across annotation and labelling teams.
- Built **dashboards** to monitor FP/FN rates and guide retraining; improved **scratch precision from 82% to 87%** and recall from **83.7% to 84.2%**.

Image Quality Model — HydraNet LLM Upgrade

- Led HydraNet image quality model migration from **GPT-4.0 mini to GPT-5.4 mini**, covering blur, lighting, obstructions, angle crops, vehicle presence, and image completeness.
- Designed A/B testing across historical and new datasets before production rollout to validate model stability and quality.
- Tuned confidence thresholds to reduce false image rejections from **40% to 11% per 1,000 images**.

Agentic Development & AI Automation

- Led the Bolt inspection journey revamp using **Claude and Codex**, with approximately **80% of the revamped codebase generated through AI-assisted development**.
- Piloted Claude AI agents to automate labeller refinement in the damage detection pipeline, reducing manual annotation effort and accelerating retraining cycles.

Bolt Inspection (Mobile App)

- Led **4 major mobile app releases**, delivering UI/UX improvements, new inspection journeys, and customer-driven enhancements.
- Drove a full app refactor enabling offline inspections, improving completion rates in low-connectivity regions by **30–40%**.
- Integrated modern libraries and third-party tools to improve scanning accuracy, reducing rework and manual validation by **25%**.

AVIS Claims & Inspection (Mobile App)

- Led **3 app releases**, introducing **Airport QC workflows** and dynamic **WhatsApp journey integration** to streamline customer interactions.

- Redesigned the claims submission journey with design and engineering leads, improving usability and reducing user friction.
- Ensured on-time releases with strong focus on **stability, performance, scalability, and user experience.**

Scans Kenya (Mobile App)

- Led a unified app release combining **Uber and Bolt inspection journeys** into a single platform for the Kenyan market.
- Integrated **mechanical inspections and VIN validation** alongside core pre-inspection journeys.
- Delivered a scalable multi-client solution supporting diverse regional and operational requirements.

Customer Support Analytics

- Analysed Wati driver-support logs across **YoY, monthly, and quarterly trends** to identify recurring pain points such as report downloads and driver knowledge gaps.
- Converted support insights into product improvements to reduce avoidable support contacts and improve driver self-service.

Internal Products

- Built **Smart Recording**, an internal backend system converting real user app journeys into video replays for faster debugging and root-cause analysis.
- Implemented real-time face recognition using **AWS Face Rekognition** for ID verification, improving fraud detection and reducing identity spoofing risk.

Assistant Product Manager

IndiaMART InterMESH Ltd

03/2023 – 04/2024 | Noida, India

Customer Analysis

- Conducted an extensive analysis on data using KPIs like BL consumption, PNS calls, DAU, Replies, Activity on page etc
- Executed 200+ detailed case studies, addressing precise customer wants, needs, & challenges.
- Implemented customer segmentation, performed trend analysis and developed Specific User Personas
- Performed deep-dive analysis into their specific issues and brain-stormed solutions

Stakeholder Management

- Coordinated with different PMs, Led Developers and Designers in Product Backlog, Sprint planning, Sprint Backlog, Sprint Review and Daily Scrum meetings to understand challenges, sprint status and way forward
- Coordinated with Executives, BMs, Cluster Heads and other business stakeholders for feedback.

Projects

360 Servicing Engagement Program, Design & Implementation

- Launched a product targeting non-engaged clients and identified high-risk clients based on the significance of parameters.
- Tracked screen usage, productivity & client Engagement Improvement daily, weekly, and monthly.
- **5000+ clients enriched & engaged (Monthly)**

CMR/C+1 Cases Screen and Churn Dashboard, Design & Implementation

- Developed a dashboard showcasing churn cases and completion status on various parameters.
- Tracked screen usage, challenges, productivity, and Churn Improvement on a monthly basis.
- **0.8% Reduced Churn**

Welcome Call 2, Design & Implementation

- Developed screen for catering problems of newly hosted clients
- Tracked screen usage, challenges, productivity on a weekly and monthly basis.
- **Reduced early tickets**

Profile Check Screen Optimization, Design & Implementation

- Consolidated data onto a single screen, Reduced client's profile understanding time significantly.
- Improved efficiency in case management, issue resolution & decision-making for executives.
- **Reduced 10 clicks to 3 clicks**

Product Analyst Intern

Scans.AI

04/2022 – 06/2022

Johannesburg, SA (Remote)

- Identified and Generated critical insights to adapt the product for regional adaptability
- Interacted and Coordinated with different teams for product development and delivery
- Enhanced and developed customized features for different use cases of product Car Listing
- Analyzed and Streamlined the Onboarding process for different platforms (Web and App.) Designed and delivered a simplified structure for separate login credentials for each client
- Derived 'Use Cases' in coordination with the Production and WhatsApp Integration team
- Refined features from labeller's Dashboard to improve UI and employee effectiveness

- Identified and reduced the overall lead time of the labeller's report submission (Reduced by 4 min)
- Analyzed the reason for the drop in engagement for every single journey and Implemented the derived solutions to reduce the user drop in the user journey for different clients
- Analyzed and rectified the messaging on every screen in user journeys(7-8 Screens) (Mobile App)

Project Coordinator Intern
ATOZ GENERAL CONTRACTING LLC

02/2019 – 08/2019 | Abu Dhabi, UAE

- Handled all the IT work, Purchased and installed computers at the site, Coordinated with the mall management team for approval of MEP and Civil drawing. (7 sites)
- Organized induction of technicians and workers
- Managed and led a team of technicians and workers (10-12 people at a time)
- Monitored and reported site work status and challenges to the Project Manager (5 days/ week) (4-5 people at a time)

Education

MBA, Marketing
Indian Institute of Management (IIM), Ranchi

03/2023 | Ranchi

B.Tech, Computer Science Engineering
Lovely Professional University

05/2019 | Jalandhar

Certificates

- Certified Scrum Product Owner (CSPO) - Scrum Alliance 2023
 - Google Analytics - Google Academy 2023
- Certified Product Manager (CPM) - Phoenix Global 2021
- Break Into Product Management - Product Space 2022

Skills

Product: Product Management, Roadmapping, User Stories, Product Lifecycle Management

Agile & Delivery: Scrum, CSPO, Sprint Planning, Release Management, Agile Methodologies

Technology: AI/ML Products, Computer Vision, Mobile Apps (iOS/Android)

Data & Analytics: KPI Analysis, Power BI, Google Analytics, Market Research

Collaboration: Stakeholder Management, Cross-functional Leadership
